

Centre Records

The following pages provide a listing of all current Caulfield Centre records at the conclusion of the most recent summer season. Track records set prior to the introduction of electronic timing equipment and records for events no longer part of the program have been archived. Whilst care has been taken to ensure all details are correct and up to date, if we have made an error, we apologise. If you believe you have set a new record or an error has been recorded, please email competition@caulfieldlittleleaths.org.au with the details and errors will be rectified for the following year's handbook.

Performances recorded at regular Centre Competition, and Region, State, or Little Athletics Australian Team Championships are recognised. Cross Country best performances are recognised at regular competition day, Region/State Championships or at Open Days that are electronically timed.

Track

All electronic times, regardless of placing, qualify as a potential record. Electronic times are those that are electronically started and finished. With hand timing, 3 official watches must be used to verify a potential record. Both manual and electronic times will be recognised as Centre records.

Track records, for less than 400 metres, will be allowed when there is strong wind assistance. The Centre Competition Director, in consultation with the Chief of Officials and the President, will decide on wind assistance.

Field

The parent of an athlete may not measure field event records.

On Centre competition days, field event records must be checked & signed by two members of the Centre Executive before the measuring spike is removed or high jump height altered.

Wind assistance does **NOT** factor in the recording of any field Centre Record.

In the table below:

- **Yellow** highlight indicates a record broken in the most recent season
- **Grey** highlight denotes historical records for events no longer recognised as official LAVic events for that age group
- **Aqua** highlight denotes a record that was broken in 2011, but missed and not updated previously which has now been rectified
